Summary

Applied AI Engineer with around 2 years of production experience building agentic AI systems, RAG pipelines, and LLM workflows at Accenture on a live Fortune 500 insurance engagement (Chubb). Skilled in LangChain, LangGraph, MCP, and multi-agent orchestration with OpenAI GPT-4 and Claude APIs. Deployed retrieval systems using Pinecone and Chroma for enterprise-scale document processing.

Technical Skills

AI/ML & Agents: LLM Integration (OpenAI, Anthropic Claude), Agentic AI Systems, LangChain, LangGraph, Prompt Engineering, RAG, Embeddings, Vector Search, Tool Use, Agent Memory, MCP (Model Context Protocol)

Backend: Python (Primary), FastAPI, RESTful APIs, Node.js, Express.js, Spring Boot, Java, JavaScript

Database & Cloud: MongoDB, MySQL, Vector DBs (Pinecone, Chroma), Azure DevOps, Docker, CI/CD, AWS, Azure

Frameworks & Libraries: LangChain, OpenAI API, Hugging Face, Bash, SQL

Development: Agile/Scrum, Git/GitHub, Code Reviews, OOP, DSA

Certifications: Claude Certified Architect (Anthropic), Reinvention with Agentic AI(Accenture), GitHub Actions (Microsoft)

Experience

Accenture India Pvt. Limited — Chubb Insurance (Client Engagement)

Bengaluru, India

Associate Software Engineer — GenAI

Nov 2024 – Present

- LLM Workflow Automation** Accelerated enterprise document AI throughput by 40% by engineering Python-based LLM workflow automation tools orchestrating multi-step AI/ML tasks across a live Chubb insurance production environment.
- Prompt Engineering** Improved structured insurance query accuracy by 35% by designing production prompt templates for OpenAI GPT-4 and Claude 3 using chain-of-thought, few-shot, and output constraint strategies.
- RAG Pipeline Engineering** Reduced document retrieval latency by 45% (P95: 4.2s → 2.3s) by building RAG pipelines with LangChain, Pinecone, and hybrid BM25 + semantic search over 15,000+ policy documents.
- Multi-Agent Orchestration** Enabled stateful multi-agent execution across 10+ tool-use steps by architecting a LangGraph + MCP orchestration framework with tool-calling, memory, and agent state management.

Projects

Multi-Tool Autonomous AI Agent System (Python, LangChain, LangGraph, OpenAI GPT-4)

GitHub

- Achieved autonomous goal decomposition across 15+ reasoning steps by architecting a LangGraph agent with dynamic tool routing over web search, calculator, and structured data retrieval.
- Maintained coherent context across 20+ turn conversations with 30% token reduction by implementing ConversationSummaryBufferMemory with dynamic summarization.
- Reduced agent tool-selection errors by 50% vs baseline ReAct agent by designing a LangGraph state machine with conditional edge logic and tool-call validation.

Document Q&A System with RAG Pipeline (Python, Pinecone, OpenAI Embeddings, FastAPI)

GitHub

- Delivered semantic Q&A over 10,000+ document chunks with RAGAS faithfulness score of 0.88 and answer relevancy of 0.91 — evaluated against a 200-question gold set — by building a full RAG pipeline using LangChain text splitters, OpenAI text-embedding-3-large, and Pinecone with MMR-based retrieval.
- Achieved sub-2s end-to-end response latency at P95 — measured via locust load testing at 20 concurrent users — by serving the pipeline through an async FastAPI backend with streaming LLM responses and connection pooling.
- Improved retrieval precision by 38% over naive semantic search — measured by hit-rate@5 on evaluation queries — by implementing hybrid BM25 + dense vector search with LangChain's EnsembleRetriever and contextual chunk reranking.

Education

Haldia Institute of Technology

Haldia, West Bengal

Bachelor of Technology in Computer Science | CGPA: 8.24/10.0

2020 – 2024

Coursework: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks, Distributed Systems

Achievements

Claude Certified Architect — Certified in Claude and Model Context Protocol (MCP) by Anthropic Academy, demonstrating expertise in agent-tool integration and advanced LLM orchestration patterns.

Top 5% in Java & SQL Bootcamp — Strong programming fundamentals and problem-solving skills validated through competitive assessment.

200+ DSA Problems Solved on LeetCode — Consistent algorithmic problem-solver with demonstrated code optimization abilities alongside professional work.
